

# SPECIFICATIONS

Product Description: **COOLING VEST**  
Part Number: **8400**  
Style: **AIR**

## GENERAL DESCRIPTION:

The air vest is designed to afford cooling to personnel in circumstances where air conditioning is not feasible. The vest connects to any existing clean compressed air source. The patented engineered jets cool the air, keeping the wearer continuously doused with refrigerated air. The airflow enhances the body's natural evaporative cooling. The airflow additionally keeps the grit, dust and fibers out, while keeping the wearer dry.

## CONSTRUCTION:

- Durable and rugged construction
- Breathable nylon material.
- Nylon belt keeps vest secure.
- Plastic buckle.
- Standard ¼" Snap Tite™ quick-disconnect coupler.
- Can be worn under protective clothing
- Standard size can fit body weight 130-250 lbs.
- Lightweight ( 1.5lbs)

## PERFORMANCE:

- Vest will consume 5.5 CFM @ 60psi (depending on use)
- Exchanges air seven times a minute
- Quiet operation
- Recommended for environments up to 120° F

## ACCESSORIES:

P/N: 8400-50 50 foot air source hose  
P/N: 8400-100 100 foot air source hose.
