

Flow Check

Smoke generated by the Flow Check is a useful tool in the heating ventilation and air conditioning (HVAC) industry. The visible plume of smoke allows one to actually see the direction and dispersion of air currents. This cloud may also be used for determining the relative speed of these air movements. The Flow Check is ideal for technicians dealing with air balancing or adjusting louvers in offices or institutions. This tool is also useful when performing indoor air quality studies.

Not only is the comfort of humans an important concern, but the health and safety of many of workers is controlled by ventilation. Fume hoods and spray paint booths are two of the many examples in which currents are used to flush away or dilute hazardous gases. The Flow Check is ideal for checking air directions and effectiveness in these applications.

The Flow Check can also be used as a leak detection device. The smoke generated can be used for checking airflow outside airtight doors or other barriers. This ensures that there are no leaks into clean rooms, contaminant areas or other places that must be separated.

Features :

- Environmentally safe
- Puffs of smoke or continuous cloud
- Easy to operate
- One hand operation
- Lightweight
- Ergonomic design

Technical Data

Size	approx. 11.8 x 7.9 x 2.8 inch (300 x 200 x 70 mm)
Weight	17.6 oz. (500 g)
Power Supply	Rechargeable NiCd batteries
Operating Time	Battery: 20 minutes / charge Ampoule: approximately 5 minutes

Order Information

Flow Check Air Flow Indicator Kit (With Ampoules)	6400761
Charger, 100 VAC	6400802
Charger, 12 VDC (automotive)	6400803
Smoke Generating Ampoules (3 Ampoules + 1 nozzle)	6400812
Battery Pack	6400817
