

Rescue Pak

The Rescue Pak is ideal for use in confined space, Haz Mat response, tank entry and cleaning, sewer maintenance and chemical handling operations among other applications. It can serve as a primary air source by using cylinders for breathable air, or when using an external high pressure source (e.g. a compressor), the cylinders can provide air for emergency egress.

Any SCBA type cylinder can be used with the Rescue Pak. The CGA 347 fitting which is standard and permits use of either low or high pressure cylinders (up to 4500 psi). A directional valve in the pneumatics ensures only one cylinder at a time is supplying air.

The Rescue Pak features an adjustable regulator for 4 quick connect outlets, a second regulator for a 5th quick connect outlet and a low pressure alarm whistle. The fifth air connection with its dedicated regulator provides air at a different, lower pressure than to the respirators. This connection is ideal for pneumatic tools.

Rescue Pak has a lightweight frame with 8" ball bearing wheels and a telescopic handle for the ease of movement and portability. The telescopic handle provides compact storage in the down position. On the rear of the Rescue Pak, up to 50 feet of supplied airline hose can be stored.

Technical Data

Weight:	56 pounds (without cylinders) 67 pounds with optional cover
Dimensions:	37"L x 27"W x 14.5"D (Handle Collapsed)
Frame Material:	Powder coated aluminum
Regulator:	0 – 5000 psi incoming, 0 – 125 psi outgoing
Sockets:	Hansen Brass (other available upon request)
Relief Valve:	125 psi ASME preset
Warning Alarm:	Pneumatic whistle set at approximately 500 psi
Flow Rate:	80 cfm (2260 lpm) @ 120 psi Primary Regulator 20 cfm (560 lpm) @ 120 psi Secondary Regulator

Order Information

Part Number

Rescue Pak	4053977
Aluminum Cover for Rescue Pak	4055257
Aluminum 2216 psi 30 minute Cylinder	4054856
Carbon 4500 psi 60 minute Cylinder	4055699
